# HUNTINGTON HOMES SHINE FOR NATIONAL SOLAR TOUR

Five solar-powered homes in the Town of Huntington will be open to the public for free visits on Saturday, October 7<sup>th</sup> from 10 AM to 4 PM as part of the National Solar Tour & Green Buildings Open House on Long Island. Tour visitors can learn about solar and other forms of renewable energy directly from the people in their community, watch electric meters run backwards, and see the actual savings on utility bills.

These local open houses are part of an island-wide tour of about 100 sites that use solar energy for electricity or heat. The Long Island Power Authority (LIPA) and Renewable Energy Long Island (RELI) are co-organizing the tour on Long Island, with Northeast Sustainable Energy Association (NESEA) at the regional level and the American Solar Energy Society (ASES) at the national level. The tour is expected to attract tens of thousands of visitors nationwide and has been billed as the largest public renewable energy education event in the world.

One home available to tour, the Brazeau residence in Huntington Station features a 2.4 kW solar electric system which significantly reduced the owners' electric bill. Another, the Fostek residence in East Northport has a 10 kW system. Other homes on the Tour within the Town of Huntington are located in Huntington and Northport.

"We think they are so beautiful and are thrilled to pull into our driveway and see them everyday. Our bills have been in single digits at times", said Tour Host Stephen Brazeau of Huntington Station.

Linda and Stan Fostek of Northport said, "Installing our solar electric system was very empowering. We felt that we had taken some control back on our energy costs and at the same time we were also contributing to the community by reducing some of the strain on the power grid. We're both very excited to be part of the Solar Pioneer group."

LIPA currently offers substantial, upfront cash rebates (up to \$37,500) for the installation of solar electric systems. Combined with new income tax credits, these incentives can reduce the cost by 2/3.

"The annual Solar Tour is a great way for people to gain first-hand knowledge about the residential application of PV systems," said LIPA Chairman Richard M. Kessel. "LIPA's rebates go a long way toward making the installation of a residential solar system more affordable, and the enhanced state tax credits help lower the overall cost even further. We hope the Solar Tour will encourage others to join the ranks of Long Island's Solar Pioneers."

"The Solar Tour is really the best way to 'kick the tires' and talk to home and business owners directly to find out whether solar energy would work for your home or business", said Gordian Raacke, Executive Director of Renewable Energy Long Island (RELI).

The public may participate in this self-guided tour free of charge but will need to obtain a free Visitors Pass from RELI. The Visitors Pass and information on the tour and solar energy technologies & incentives are available at [www.RenewableEnergyLongIsland.org](http://www.RenewableEnergyLongIsland.org) or by calling (631) 537-8282.
