OYSTER BAY HOMES SHINE FOR NATIONAL SOLAR TOUR

Nine solar-powered homes in the Town of Oyster Bay will be open to the public for free visits on Saturday, October 7th from 10 AM to 4 PM as part of the National Solar Tour & Green Buildings Open House on Long Island. Tour visitors can learn about solar and other forms of renewable energy directly from the people in their community, watch electric meters run backwards, and see the actual savings on utility bills.

These local open houses are part of an island-wide tour of about 100 sites that use solar energy for electricity or heat. The Long Island Power Authority (LIPA) and Renewable Energy Long Island (RELI) are co-organizing the tour on Long Island, with Northeast Sustainable Energy Association (NESEA) at the regional level and the American Solar Energy Society (ASES) at the national level. The tour is expected to attract tens of thousands of visitors nationwide and has been billed as the largest public renewable energy education event in the world.

One home available to tour, the Lupski residence in Hicksville features an 8 kW solar electric system which has greatly reduced the owners' electric bill. Another, the Santoro residence in Locust Valley also features a solar electric system. Other homes on the Tour within the Town of Oyster Bay are located in Bayville, Bethpage, East Norwich, and Massapequa (one home and one church).

"Considering the way oil prices are going, this is the best investment I've made", said Tim Lupski. "The most expensive electric bill I've had this year was \$6 and 10 cents."

"The most impressive thing is that when I see my electric meter go backwards - I feel great!", said Angelo Santoro of Locust Valley. "As energy prices go up, solar looks better and better."

LIPA currently offers substantial, upfront cash rebates (up to \$37,500) for the installation of solar electric systems. Combined with new income tax credits, these incentives can reduce the cost by 2/3.

"The annual Solar Tour is a great way for people to gain first-hand knowledge about the residential application of PV systems," said LIPA Chairman Richard M. Kessel. "LIPA's rebates go a long way toward making the installation of a residential solar system more affordable, and the enhanced state tax credits help lower the overall cost even further. We hope the Solar Tour will encourage others to join the ranks of Long Island's Solar Pioneers."

"The Solar Tour is really the best way to 'kick the tires' and talk to home and business owners directly to find out whether solar energy would work for your home or business", said Gordian Raacke, Executive Director of Renewable Energy Long Island (RELI).

The public may participate in this self-guided tour free of charge but will need to obtain a free Visitors Pass from RELI. The Visitors Pass and information on the tour and solar energy technologies & incentives are available at www.RenewableEnergyLongIsland.org or by calling (631) 537-8282.
