RIVERHEAD HOMES SHINE FOR NATIONAL SOLAR TOUR

Five solar-powered homes in the Town of Riverhead will be open to the public for free visits on Saturday, October 7th from 10 AM to 4 PM as part of the National Solar Tour & Green Buildings Open House on Long Island. Tour visitors can learn about solar and other forms of renewable energy directly from the people in their community, watch electric meters run backwards, and see the actual savings on utility bills.

These local open houses are part of an island-wide tour of about 100 sites that use solar energy for electricity or heat. The Long Island Power Authority (LIPA) and Renewable Energy Long Island (RELI) are co-organizing the tour on Long Island, with Northeast Sustainable Energy Association (NESEA) at the regional level and the American Solar Energy Society (ASES) at the national level. The tour is expected to attract tens of thousands of visitors nationwide and has been billed as the largest public renewable energy education event in the world.

One home available to tour, the Atela residence in Riverhead features a 4.1 kW solar electric system which significantly reduced the owners' electric bill. Other homes on the Tour within the Town of Riverhead are located in Aquebogue, Calverton and Riverhead.

"We love it and are definitely saving money since we've gotten up and running. We are definitely thrilled!" said an enthusiastic Deborah Atela of Wading River.

Tour Host Phil Barbato of Jamesport said, "We've basically had no bills during the summer. If more people knew the advantages, they would install these. All the technology needs is more publicity and it sells itself. Once I told my friends about my bills and my tax credits, they installed solar panels too."

LIPA currently offers substantial, upfront cash rebates (up to \$37,500) for the installation of solar electric systems. Combined with the new income tax credits, these incentives can reduce the cost by 2/3.

"The annual Solar Tour is a great way for people to gain first-hand knowledge about the residential application of PV systems," said LIPA Chairman Richard M. Kessel. "LIPA's rebates go a long way toward making the installation of a residential solar system more affordable, and the enhanced state tax credits help lower the overall cost even further. We hope the Solar Tour will encourage others to join the ranks of Long Island's Solar Pioneers."

"The Solar Tour is really the best way to 'kick the tires' and talk to home and business owners directly to find out whether solar energy would work for your home or business", said Gordian Raacke, Executive Director of Renewable Energy Long Island (RELI).

The public may participate in this self-guided tour free of charge but will need to obtain a free Visitors Pass from RELI. The Visitors Pass and information on the tour and solar energy technologies & incentives are available at www.RenewableEnergyLongIsland.org or by calling (631) 537-8282.
